

Manage My Mobiles

Control over your mobile fleet

Manage My Mobiles is a mobile fleet administrator portal that allows a company control over its mobile fleet. This simple to use and highly functional portal puts the power of a mobile network into the hands of the person that needs it the most – you.

Simply log on to Manage My Mobiles and you will be able to carry out the functions that the major networks would normally carry out on your behalf.

Respond quickly to your staff when they need call bars applied or lifted, or their calls forwarded automatically to another number, ensuring that down time is kept to a minimum.

As well as applying network settings directly on the core of the mobile network, Manage My Mobiles provides you with usage reports which you can configure and send out as usage alerts for everyone within your company.

Manage My Mobiles will show you, at a glance, the top five users within your company, categorised by call type.

Manage My Mobiles

Functionality at your fingertips

The wide range of functions in Manage My Mobiles enables you to carry out the following network actions:

Call Barring options

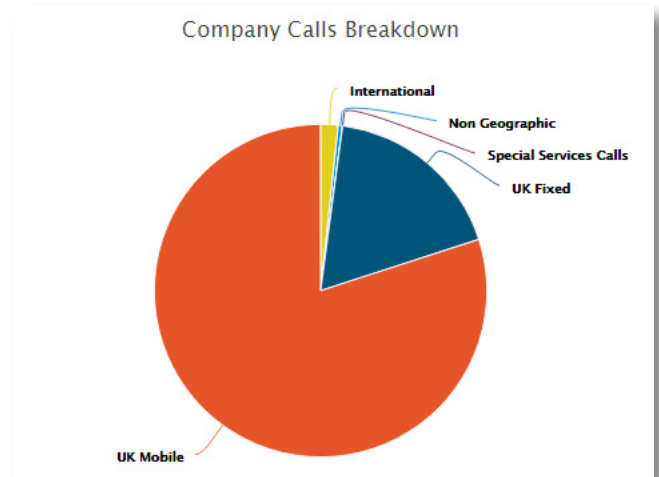

- Outgoing voice calls
- Incoming voice calls
- Outgoing SMS
- Incoming SMS
- Premium Access

Data Barring options

- Data
- Enable adult content
- Data roaming

View usage and set alerts

You can view voice, data and SMS usage within your company. Total usage can be viewed either at company level, group level (such as cost centre) and by person. The reports are easily downloaded to review when you need them.

To help you monitor usage you can set up usage alerts and have them sent to multiple people either as an SMS or email. You can set alerts for the following usage types:

UK Minutes	
Voice	UK, EU, ROW
SMS	UK, EU, ROW
Data	UK, EU, ROW

With all of this functionality at your fingertips you will be able to quickly and easily amend your mobile network settings and control your company's usage, saving time and money. At the same time you'll be freeing up your time to carry out all your other tasks.
