

Say hello to the technology and communications keeping your business connected

We're in the middle of a digital revolution with technology changing the way we live and work. However, the technology and connectivity that transports and communicates this digital information is often a jumble of unreliable, capacity constrained old technologies.

This is a problem as every business is dependent on that connection. It's how they access key systems, critical data and stay in touch with their customers and supply chain.

Now is the time to focus on being digitally ready and build the essential infrastructure to support this increasingly digitised world.

Business challenges and priorities

- Driving a compelling customer experience through a seamless multi-channel
- Maximising resource, increasing productivity and driving efficiencies
- Ensuring always on, reliable connectivity that provides the modern infrastructure your business needs
- Empowering fixed and remote workforce and enable better collaboration
- Support in keeping processes, systems and data secure
- Flexible and scalable cost management and procurement options
- Guidance on how to unleash the full potential of modern technologies

How can we help

STL Communicate: scalable and reliable voice and mobile solutions

STL Connect: fixed/mobile connectivity, cloud-based platforms and collaboration tools

STL Collab:IT: IT services and support

- **Resilient infrastructure of ultra-fast, reliable connectivity** (full fibre, broadband)
- **Tools to work securely from anywhere** (collaboration, video, M365, TaaS, mobile, wifi)
- **Modernised ways of working** (traditional services to the cloud, digital readiness)
- **Seamless customer service** (integrated multi-channels, hosted telephony, contact centre)
- **Increased productivity** (insight data, workforce analytics)
- **Protected business** (cyber security, disaster recovery, back up)
- **Improved flexible cashflow** (cloud computing, Tech-as-a-Service)

What can you expect from STL?

We build and deploy agile solutions that are designed around customer needs.

Put communications at the core of your business.

25

years experience

Use technology to enable your people, processes and drive productivity.

1200

connected customers

Provide the infrastructure to support this increasingly digitised world so that your business remains current and competitive.

ISO

accreditation

Technology and communications are at the core of any business and play a critical role in driving momentum and helping all businesses move forward.

The starting point has to be a great infrastructure - connectivity. Strong and flexible networks, both fixed and mobile. Plus smart devices and applications that help you do more in less time. When you've got that, you can give your people the tools they need to work securely, anywhere. You can make teamwork easier, collaborating even on the move. You can keep your customers happy, regardless of how they want to get in touch, as you have up to date information on their needs and wants. Overall, you can work faster, safer and smarter – and all while keeping costs down.

STL provide IT & Communications to help keep a business, its people and customers connected.
